PRANAV IYER

646-956-9715 | Brooklyn, NY
pn2229@nyu.edu | linkedin.com/in/pranavniyer | pranavn1234.github.io/Portfolio/ | github.com/PranavN1234

Skills

- **Programming Languages:** Python, C++, Golang, Java, TypeScript, Swift
- **Databases:** MySQL, PostgreSQL, VectorDbs
- **Frameworks/Libraries:** React, Flask, Spring Boot, JUnit, SwiftUI
- **Technologies and Tools:** REST APIs, Docker, Jenkins, WebSockets, gRPC, Multithreading, OAuth, OpenAI APIs
- **Cloud:** AWS (DynamoDB, Lambda), GCP Cloud Run

Professional Experience

Fullstack Engineer Intern — **New York University** — May 2023 – May 2024

- Streamlined API access request and approval processes in an NYU web portal using **Flask**, **React.js**, and **MySQL**, automating email notifications for complete process flow
- Contributed to increasing the user base from 60 to 270 through the development and enhancement of the application
- Achieved 100% test coverage for request creation and data fetching using Flask's unit testing and TDD practices
- Improved UI responsiveness and consistency by using AntD's standardized components within React
- Integrated NYU Shibboleth OAuth, enhancing security and compliance, reducing unauthorized access by 40%

Software Engineer — **Bank of America** — July 2021 – August 2022

- Conducted monthly scans of 25 million records per assigned database to identify potentially sensitive information
- Increased monthly database scans per engineer by 75% by developing a job scheduler to automate execution from a CSV of config IDs
- Automated CSV report validation with a **Python** filter utility, cutting processing time by 70%
- Expanded mainframe capabilities through rigorous **COBOL**, **JCL** and **IBM z/OS** training, reinforcing contribution to mainframe-based projects and legacy systems

Education

New York University *(Merit Scholarship Recipient)* — September 2022 – May 2024
Master of Science in Computer Engineering; GPA: 3.94/4 — New York City, NY
Courses: Database Management, Java, Operating Systems, Data Structures and Algorithms, Cloud Computing

Vellore Institute of Technology — July 2017 – June 2021
Bachelor of Technology in Computer Science and Engineering; GPA: 8.79/10 — India

Projects

Zippy - In-Memory Data Store (C++, gRPC, Multithreading) [Code]

- Engineered Zippy, a high-performance gRPC-based in-memory data store using C++, achieving an average throughput of 2753 ops/sec for GET operations, enhancing real-time data retrieval efficiency
- Implemented advanced features in Zippy such as TTL-based data expiration and merge-on-update snapshotting for data persistence

Collaborative Document Editing Backend (Go, WebSockets, TypeScript) [Code]

- Built CollabDoc, a real-time collaborative document editor using Go and TypeScript, supporting seamless multi-user editing
- Implemented Operational Transformation and WebSocket communication for low-latency updates and efficient concurrency handling

Leya - CLI package (Python, CLI development, Generative AI, AST Trees) [Code] [Package]

- Engineered and deployed a cross-platform terminal tool that seamlessly integrates with GitHub repositories for cloning and code analysis
- Enhanced debugging efficiency with Leya by introducing function-specific queries, cutting manual search efforts by 50%

Publications and extracurricular activities

- **Authored five papers published in IEEE conference proceedings and one research article in a Scopus-indexed journal [More info]**
- **2040 Now Ambassador, New York University:** Spearheaded event coordination for sustainable initiatives, including food choices and eco-friendly fashion
